

EVERY LITTLE THING YOU DO IS MAGIC TAROT

CALLIE LITTLE *and* MOOREA SEAL

WHY OUR COURT CARDS HAVE NEW NAMES

If you have used other tarot decks, you've probably seen court cards labeled as Page, Knight, Queen, and King. We are here to shake up the inherent biases in the traditional world of the royal courts. In our tarot world, all people are welcome and given the opportunity to rise. For this reason, we have renamed our court cards:

THE APPRENTICE: *Someone in pursuit of growth or gaining new opportunities for educational progress. They have quite a way to go before becoming masters of their own wisdom, influence, and skill.*

THE CHAMPION: *Someone who has been through great training and has likely risen in rank with much success. They've been lauded externally but have yet to truly embody inward mastery of the self.*

THE ORACLE: *Someone who has done internal work to seek deep wisdom. They have been on a vision quest and will soon re-enter the physical world to commune with those who have also been to the other side.*

THE ELDER: *A peaceful and powerful sage who has lived a full life, adventured inward and out, and communed with others from a variety of world perspectives. They have found enlightenment and are willing to share wisdom to uplift others.*

NUMEROLOGY

Numbers hint at the spirit behind a card, poking at grander themes beyond our individual experience, making them an important layer for any tarot reading. While intuition informs our personal interpretation of each card, numerology provides distinct instruction on how to connect with tarot.

A BRIEF HISTORY OF TAROT

It's difficult to find hard evidence of where myth and fact separate and come together, but we can assume that the search for secret, inner wisdom has been a human pursuit for thousands of years, as evidenced by the existence of many secret societies and religions, timeless philosophical quandaries, and records of self-reflection. And cartomancy, the reading of cards for divination and the curiosity of self, has likely been around even before its first documentation in the fifteenth century.

Today, you can find hundreds of thousands of people from all walks of life using tarot for personal use. What was once associated with secret societies and hidden wisdom has become accessible to all who seek a deeper knowing of the self and the world around them . . .

FOURTEENTH CENTURY

A grand conference of Kabbalists and other masters, which many scholars believe was the root of the ritualistic journey of the tarot, takes place in Morocco.

FIFTEENTH CENTURY

The Visconti-Sforza deck, painted by Bonifacio Bembo for the influential Visconti family of Milan, is the earliest evidence of a classic deck of playing cards that Italians called tarocchi.

EIGHTEENTH CENTURY

French occultist Antoine Court de Gébelin makes the claim that tarot originated from the Book of Thoth. His fellow occultist Etteilla pioneers an interpretation concept for tarot cards around 1783, influenced by Marie Anne Lenormand, a divination professional, and adapts Lenormand's form of card-reading to the reading of tarot cards.

NINETEENTH CENTURY

The poet, author, and esoteric Eliphas Lévi creates the Tarot of Marseilles deck; it is noted as the first deck used specifically for occult purposes.

TWENTIETH CENTURY

The Rider-Waite-Smith deck is published in 1909. The collaboration between the artist and occultist Pamela Colman Smith and the academic and mystic A. E. Waite is influenced by the hermetic order of the Golden Dawn, friends of Smith's, and Eliphas Lévi's interpretation of tarot. A few decades later, Aleister Crowley and Lady Frieda Harris publish the Thoth Tarot.

CARD PULLS + SPREADS

Intuition is not a mystical, untouchable force reserved only for the most magical thinkers. It is the subconscious knowledge that connects dots we don't notice on a surface level; it often works separately from our conscious mind. Tarot asks us to marry this inner knowing with its own language.

Speak with your cards using these suggested spreads and pay close attention to what you notice.

DAILY WISDOM Touching your cards each day will help you build a relationship to the practice of tarot, your intuition, and devotion. Keep a deck at your bedside, on your desk, or in the glove compartment of your car. When pulling a daily wisdom card, open yourself up to whatever your deck has to offer. If you feel confused, disconnected, or need clarity on the message, consider pulling a second card.

CALLING FORTH MENTORSHIP When you need a guiding light, shuffle your deck and imagine a blank space that fresh energy can fill. You might envision a person whose features are just out of focus, or a vase occupied by an abstract concept. Pull one card and, as you read its description, imagine filling this empty space with your interpretation. Allow this visualization to take the shape of an imagined mentor and consider this guide throughout your day.

THEME, MESSAGE, GUIDE Try this three-card spread created by the American witch Amanda Yates Garcia (AKA the Oracle of LA) if you are unsure what to ask but want to open yourself up to the wisdom of the universe. The first card, the theme, illustrates the context of your reading. The second card, the message, is the lesson seeking to be understood and acted upon. Finally, the guide is the energy you can take on to accomplish what must be done. It may be the ingredient that has been missing all along!

THE MAJOR ARCANA

The Majors are revelations. The arc of the Major Arcana is often referred to as the Fool's Journey or Hero's Journey, which tells the story of an excitable youth in search of adventure. Each card represents a theme or archetype in the shared human experience. As the Fool travels through the Major Arcana, they face physical danger, intellectual challenges, emotional heartaches, and a breaking of the ego. They meet guides along the way but face their ultimate battle alone, leaving them with well-worn scars. After reaching this peak in their personal narrative, they return home triumphant, aged, enlightened, and wiser.

We encourage you to read beyond the title of each card and into the symbolic artwork; find your own intuitive meaning. The cards are abstract representations of concepts that already live within us. Readings are never instructions on how to live your life—the cards are just here to help light the path ahead.

THE FOOLS

The Fool is the card of the natural world, embodying a spirit of recklessness. The instinct to frolic has taken over, and we find ourselves leaping across canyons into the unknown. While curiosity may have killed the cat, this card trusts that satisfaction with lessons learned along the way will bring the cat home.

So maybe it's a little reckless to run free, but . . . why not be a little reckless? Explore! Adventure! Express! Be the court jester who speaks truth masked in humor. Trust the raw impulses within you. It's time to jump.

REVERSED: Call yourself out when you are not trusting your instincts. What is holding you back? Take that risk you've been avoiding and don't worry about perfect planning. Be a Fool and it might pay off in ways you'd never even imagined.

NUMEROLOGY 0 *The beginning, infinity, wholeness, mystery, potential*

THE MAGICIAN

The Magician is a master of the four suits—wands, pentacles, swords, and cups—and all four elements—fire, earth, air, and water. The wisdom of the Magician may seem like quite a jump from the youthful naivety of the Fool, but the Magician can represent the adolescent self, one who is excited to have gained access to the physical, creative, and spiritual tools at hand, knowing that results can be achieved if only they put in the work.

Channel your inner artist. Find a new perspective on the tools you have access to but have yet to master. Create space for inspiration, release what remains dormant.

REVERSED: Are you ignoring the resources you have? Keep in mind, the Magician holds magnificent power to illuminate or deceive. Use your creativity to harness your power for good.

THE HIGH PRIESTESS

She is the maiden, mother, and crone combined. The High Priestess knows that her place in the universe is one of unique divinity. When she shows up, she's telling you to pay attention to your subconscious—what can you see in the light of the moon? What secrets do you hold inside? How holy are the waters of your wisdom?

Spend time basking in your unique knowledge and experience. Use this magic by connecting with your community, perhaps as a peer mentor, poet, or even some kind of modern-day village witch.

REVERSED: You may be ignoring the reality of what's happening and your own gut instincts. Think back to a recent moment of tension: Consider what the root emotion was and what emotion may have bubbled up to hide the heart of the matter. Listen to the whispers of your inner self as they guide you toward clarity.

THE EMPRESS

The Empress knows how to *feel*. Rather than being concerned with how we “should” feel, we must listen to what our bodies demand, pairing emotional and physical intuition. Are you listening to what your vessel needs? Feeling is often excruciating. Luxuriate in your vulnerability.

Consider how to increase awareness of your physical needs and desires. How might you release the “shoulds” society has encouraged you to take on? Because the thing is, you were once a wild thing. You have been domesticated. It is time to become feral and reunite with your senses. Even through tears.

REVERSED: If you got yourself into a mess, consider how to move forward and create change. There is some repression at play, but your feelings are going to demand to be felt until you give in, so listen up. Reconnect to nature’s beautiful wildness, get your hands dirty, and repair your roots.

THE EMPEROR

The Daddy of the tarot, the Emperor represents discipline and unyielding power. This can, in the best of situations, look like ruling with full confidence and wisdom. In the worst cases, it can look like oligarchy and fascism. The trick to being a wise Emperor is to remember the cards that came before—the beautiful young Fool, the resourceful Magician, the mysterious High Priestess, the nurturing Empress. As our lives progress, we must integrate all iterations of ourselves rather than leave them behind. The healthy Emperor embodies this holistic, stable strength.

REVERSED: The time to get off the high horse has come. The Emperor may be a ruler, but they are still just a human being. Ego trips often look like narcissism but may actually be a result of insecurity. Ask yourself why being “better” or “worse” than others gives you a sense of self.

THE HIEROPHANT

Mentorship, guidance, and knowledge gained are the key elements of the Hierophant. It's time to seek out new or deeper teachings. Whether you are in pursuit of practical or spiritual knowledge, your resource for wisdom is just around the corner. Be wary of attaching too heavily to charismatic leaders. Avoid houses of learning that preach a singular narrative of one path or one truth.

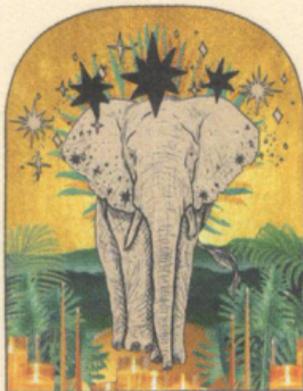

Observing the threads of wisdom woven through the ages will help you gain deeper knowledge. No single path can complete you. *You* complete you. And so, seek guidance and variety in the ways you acquire information.

REVERSED: Rejecting tradition purely because it's expected isn't necessarily the right move. Now is the moment to examine the motivation behind certain choices and be aware: You can only change yourself and your actions. Use logic to see through the fog of uncertainty.

THE LOVERS

We see this card and think of romance, new relationship energy, and yummy, sexy feelings. It's important, however, to remember that the Lovers speaks strongly to our sense of self-love. Tarot is a mirror that reflects our inner workings, and the Lovers show us what's inside our hearts.

For any union to succeed and bear fruit, everyone involved must accept and embrace the multiplicity of selves within. To truly cultivate romance and love with another, romance *yourself*. Follow the path that leads deepest within, toward wholeness and the fruitful destiny ahead.

REVERSED: Somewhere in your heart, there's a misalignment of values. You're feeling unsatisfied and unsure, whether it's in a relationship with someone else or yourself. Take a moment to analyze the conflict. You are being prompted to realign with your core truths.

THE CHARIOT

Life is full of yeses and nos. Willpower and willfulness: Do you know the difference? The Chariot arises when we are being challenged to harness our own willpower and trust ourselves.

Your objectives have been set and your inner fire will ignite your heart's devotion. You will encounter bumps along this journey, but trust that your fire is enough to fuel you. Commit yourself to self-discipline and strategize for the obstacles ahead. What are you willing to push your wheels through with brute force? What is not worth your energy? Know when to say no, the ultimate power move.

REVERSED: It's time for a U-turn. The reversed Chariot is an alert for safety of mind, body, and soul. Use your willpower to pause and reassess your direction. No one outside of you will see this shift coming. Shock them with your strategic pivot.

STRENGTH

We often assume strength is a solitary experience—that a person must stand confidently alone to embody such power. Compassion and humility are key to building strength that sustains us. Where the Chariot speaks to will and strategy, Strength speaks to a softer, inner knowing.

Your inner strength leads others to see you as a source of inspiration. The more you show up with gentleness, forgiveness, and love, the more you will see your work and identity become integral to others'. Strength asks you to practice guiding others slowly while you apply the same pace to your life and work. There is no rush.

REVERSED: Are you experiencing any explosive thoughts or feelings? Pause. Think about what you have said to yourself this week. Write down some examples to see the proof that you need time to restore your energy levels. Consider where you draw your energy and confidence from.

THE HERMIT

Sometimes life can leave us feeling the need for respite from the day-to-day, even from our beloveds. Needing alone time is natural, and giving yourself the time to indulge in healing is a major gift. You may feel restless taking time off, but when you're used to going too hard for too long, it *will* feel unusual to slow down.

Give yourself permission to zone in on your own needs. Fill your own cup so that when you reemerge, you can pour into others' cups. In this moment, you are the magical chrysalis that will transform into a butterfly with time.

REVERSED: Are you isolating to the point of sabotaging relationships, work, or other parts of your life? Be realistic: Do you really need this separation or are you just ignoring reality? Do some digging and see if something is holding you back. Remember that starting is always the hardest part.

THE WHEEL OF FORTUNE

Halfway through the Hero's Journey, one leg of the trip has come to an end and another has begun. You're right-side up then suddenly you're upside-down and uncertain. *Trust* is the name of this game.

Remember, there are stages of change. The first upheaval may feel like *the* big moment, but change is an evolution, not a singular event. One minute you're a caterpillar, embodying a grounded state of knowing. Then you're turning to goo inside a chrysalis. All you can do is *be*, reflect on what once was, and keep an open mind for what comes next. It's natural to worry. Trust nature as it helps you build yourself again, this time with more wisdom, radiance, and the capacity to truly lift off and fly.

REVERSED: Are you trying to manipulate outcomes beyond your control? Are you unwilling to accept what lies ahead? Trust the universe. It will work out, one way or another.

Justice is the card of truth. If that which has driven you lately doesn't feel restorative or authentic, prepare for accountability. If you're waiting for justice to be served, this is a sign that your challenges are concluding. It's also a reminder that in any battle, both parties' problems are valid *and* both must take accountability.

Do you trust your decisions? Are you willing to accept the consequences? Can you own your part and release it? Dig deep to find security in your choices.

REVERSED: Your inner critic has been rampaging. What if you looked at your past with acceptance instead of regret? Painful as it may be, you cannot change what's happened. In this moment, accept with forgiveness and compassion: *What is done is done and I'll make more informed decisions now.* With mistakes come the gifts of growth and wisdom.

THE MINOR ARCANA

The Minor Arcana represents the stuff of everyday life. This is not to say these fifty-six cards are at all banal; they are fleeting and perhaps simpler in essence (but what in life ever feels simple?). They speak to natural cycles, money, home, family, love, work, creativity . . . the things that make our lives uniquely ours. While the Major cards deal with big themes of existence, the Minors help us keep things in perspective. Life is not about feeling good all the time. It is not just about the highest highs and lowest lows. Life is about being.

The Minor Arcana cards are split into four suits: the fiery Wands, emotional Cups, intellectual Swords, and grounded Pentacles. Each suit is rooted in a deep elemental connection and is embodied as a different facet of our human experience.

Consider the Minor Arcana a series of snapshots from the road trip of life. Notice the memories they stir up and remember to stay present, for everything is temporary.

ELEMENTAL CONNECTION: Fire

EMBODIMENT: Our inner energy and life source

WANDS

Blazing brightly, the Wands illuminate the driving forces of our lives—passion, creativity, inspiration, and the root of our energy. Fire signs Aries, Leo, and Sagittarius might feel a warmth toward these cards. When viewed as staffs or weapons, the Wands can be considered unfavorable, but just as beauty is in the eye of the beholder, so too are the branches depicted in the suit of Wands. Are they wands—tools of creation and manifestation? Or staffs—means of warding off enemies or even beating down the competition? Look into the flames and at the coals that warm the hearth of our existence to see that one cannot exist without the other.

CONCEPTS TO EXPLORE WITH THE WANDS:

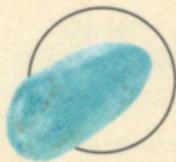

- *Igniting our inner fire*
- *Flashes of inspiration*
- *Energetic spiritual connections*
- *Curiosity about the unnamable and intangible*

You are made of pure, divine energy. A wand is a lightning bolt crackling with energy. The ace represents becoming. Manifestation. Creation. The Ace of Wands is a declaration that everything is ritual, everything is holy, every little thing you do is magic.

Ask yourself: *What energy is calling me to action right now?* Connect with your inner fire. The wisdom held within will be revealed.

REVERSED: Are you doubting yourself or feeling impostor syndrome? Perhaps something is blocking your creative potential . . . and that block may be coming from inside. Pull a clarifying card to identify what else is going on or what will help you overcome this blockage. Trust your intrinsic value.

FOUR OF WANDS

You've worked so hard to get here, and finally you've triumphed over something major. It's time to celebrate! Appreciate the labor it took to get you to this finish line. Give yourself and all those involved some thanks. Make the time and space to revel in feelings of joy, safety, and love! Cozy up with your favorite people and toast each other. You've earned it!

REVERSED: Any upset or roadblock happening right now may feel like a challenge, but it's merely a small detour on your journey. Take the difficulty of this moment and consider it proof of devotion as you keep your eyes on the road ahead. Don't lose sight of what you're after—just get to it.

FIVE OF WANDS

The Five of Wands calls us to respond to things that confuse or irritate us with curiosity. Instead of immediately reacting negatively to something that challenges your understanding of the world, approach with curiosity. Personal growth is an asset. Think of this as an opportunity for learning.

REVERSED: You're avoiding something, aren't you? If you face it, you're guaranteed a solution. Of course, with any sort of conflict, there is the chance that you won't get your way, but more often than not, when you show up willing to engage, to stay in conflict until it transforms to resolution, you will find yourself empowered with new information. Save it for later use.

SEVEN OF WANDS

Right when you feel like you're at the top of your game, someone else has to spoil it with their insecurities, projections, and false assumptions. When you stand out in a crowd, others will inevitably be drawn to you, for better or for worse. You may hold an opinion that others call controversial. Hold strong in your opinions even when others disagree. Your opinion is valid, too.

REVERSED: You have grown up in a community with a lot of critical voices. You are used to having to fight for your opinion to be heard and you're exhausted. Stop wasting your energy convincing others of something they are not willing to accept and instead, hold your power by accepting yourself as you are.

ELEMENTAL CONNECTION: Water

EMBODIMENT: Our emotions

CUPS

In the suit of Cups, we see a reflection of our innermost feelings. Water signs Cancer, Scorpio, and Pisces may identify with the themes of fluidity and the emotional depth in this suit. Traditionally, Cups are considered favorable, as they are so often associated with some of the juiciest parts of living. But of course, feeling anything can be just as much a difficulty as a joy—this is the suit of the heart, so it is also the suit of emotional anguish. No one suit is better than another and none is without its ups and downs. Like liquid, the cups are slippery. Waves of emotion are a powerful thing to hold and embody. Flow with it all.

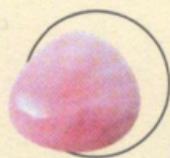

CONCEPTS TO EXPLORE WITH THE SUIT OF CUPS:

- *Allowing emotions to flow through you*
- *Observing waves of feeling and watching them pass by*
- *Exploring your own fluidity*
- *Quenching your emotional thirst*

You find yourself in a state of bliss, invigorating energy swirling all around you. Whatever is swimming your way right now, open up to its juicy, overflowing possibility! When we acknowledge reality, we can sink our teeth into it and let it drip down our chins, staining every thread in the fabric of our lives. Indulge, dear reader!

REVERSED: Take this as a sign that you are in the right place emotionally. This is the time to connect with your subconscious mind and trust your intuition. Your internal world is ripe and ready for you to bite into it however you please—don't hesitate to do this *your way*.

A WELL-LOVED
LEATHER JOURNAL

ELEMENTAL CONNECTION: Air

EMBODIMENT: Our intellect and reasoning

SWORDS

The Swords slice to the bone, revealing our cerebral selves. This is the suit of ideas, theory, and philosophy. The air signs Gemini, Libra, and Aquarius will likely see a lot of themselves within these cards. Many concepts depicted by the Swords are challenging, but on the other side of these experiences comes relief, and room for expansion and growth. What is greater than the feeling of overcoming a natural obstacle? The sense of self-worth and healthy pride gained makes the hurdle worth the jump. We encourage you to read the Swords with an open mind so that you may harvest the lessons fully rather than fear the obstacles inherent to living one's life.

CONCEPTS TO EXPLORE WITH THE SUIT OF SWORDS:

- *Gliding through challenges with grace*
- *Magic and mystery in the unseen*
- *Giving others their air space*
- *Thoughts in our orbit*

You are on the first leg of a new journey, and though it is headed in a beautiful direction, moving forward will come with loss. Perhaps the loss is something cerebral, like an old way of thinking, but maybe it was tangible: a precious item or an important person. Whatever you've moved on from, know that the grief you feel in this new phase of life does not undo the gratitude you experience.

REVERSED: Are you hanging on to something that no longer works just because change is scary? When the time comes to cut away the excess and you refuse, you are turning your sword against yourself. Remember, letting go of what no longer serves you . . . *serves you.*

TEN OF SWORDS

An unexpected ending—perhaps a betrayal or a devastating failure—has shocked your system and left a deep ache. It's a crushing reality check, but there is at least one gift to be found here. The silver lining that's hiding in this moment is very real: Many hands make light work. The loving forces in your life can help lighten this load.

REVERSED: Being haunted by past pain can be a terribly sticky thing. Keep walking with it and, like with something on your shoe, you may just get it all over everything. The best thing to do is take the time to clean up the mess sooner rather than later.

APPRENTICE OF SWORDS

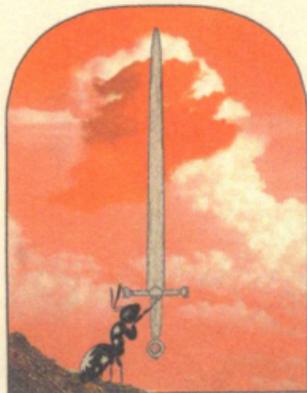

Honest, insightful, and frank, this Apprentice embodies a feminine energy whose strength is found in clear communication and an openness to new ideas. Be bold in your personal expression. Look out for opportunities—stay curious and alert. Why not take a risk? Try public speaking, start a blog or podcast, or initiate conversations with people you find intimidating. Think of it as an exploration phase, a time to be bold. Because isn't that what all of life is, anyway?

REVERSED: Always be prepared for things to go off track. That doesn't mean you should hold back on acting out your plans—you should always be moving in the direction of your dreams! This reversal simply asks you to remain aware.

CHAMPION OF SWORDS

The colorful parts of us that can be seen are so different than what's at our core, deep down in our souls. The Champion of Swords struts into your world to remind you that you cannot just walk the walk, but you must also allow yourself stillness; *feel* into the path you're on, regardless of the distractions in the forest of life. Check in often. Breathe deeply. Persevere.

REVERSED: You may be approaching certain issues in your life with unchecked power imbalances, aggression, or even tyranny. Look at what's going on when you encounter triggers and interrogate the motivation behind your frustrations. What's really pecking at you? Whatever it is, you're tempted to misplace your upset. Don't.

ORACLE OF SWORDS

This Oracle is an intuitive, fast-paced ruler. They know how to get what they want. With confidence and wisdom, they carry the heaviest of burdens with grace. You too can lead with your head while your heart remains steady and sure. You value compassion and empathy, but right now they are distractions from your astute judgment. Trust in your ability to see things truthfully and to tell it like it is. No bullshit here.

REVERSED: Some majorly bratty, resentful energy is embodied here. Is this energy coming from you or from someone else? If it's you, consider how toxic trauma bonds can distract from your growth. If the energy is from someone else, consider how their strong opinions may be overshadowing your own wisdom.

ELDER OF SWORDS

The Elder of Swords can be viewed as the sun. Without it, life would cease, but it is dangerous, too. They are the keeper of the flame, the fire of the belly, the match from which all life burns bright. Consider each side of the Elder's blade and how an object used for defense and safety can be misused as a weapon to cut others down. Be aware of the power in your life. It requires a delicate balance. Here, trust has been well earned.

REVERSED: Corruption can get the best of us, as the view from the top can become clouded and spoiled. Investigate your allies and your use of power carefully.

ELEMENTAL CONNECTION: Earth

EMBODIMENT: Our outward behavior and actions

PENTACLES

The suit of Pentacles drops into our readings with an abundance of wisdom regarding our human existence. This is the suit of Earth, where Taurus, Virgo, and Capricorn are at home. The Pentacles—also known as Coins—are often related to attainment, wealth, home, and hearth. When viewed through the lens of mental health, pentacles symbolize our outward behaviors. They can also represent strife and struggle. It's important to remember that all physical attachments come and go. Read these cards with the knowledge that there is nothing purely positive or negative within the tarot: All is subjective. Consider how every precious suit of the tarot informs your outward behavior.

CONCEPTS TO EXPLORE WITH THE SUIT OF PENTACLES:

- *What behavior of yours is learned as opposed to inherent*
- *How to get grounded*
- *The roots of being*
- *Connecting with nature*

AGE OF PENTAGONS

You are being presented with a unique path forward in pursuit of life's stability. Perhaps a career opportunity or a financial boon has appeared, or maybe you're seeking something new. This is your sign to start fresh. Go forth and take a chance on yourself! This card indicates that your investments of time, energy, and money are well-placed, and you can count on yourself to follow through.

REVERSED: You might be overlooking an opportunity that would serve you well. Now is the time to examine your fears around stability. Which worries keep you safe and which are holding you back from what you truly deserve? Alternately, keep an eye on your investments and know when to move on.

There's a lot happening in your material life. "A lot" does not necessarily mean "too much," though. Bring your attention to how you frame things. Are you saying you don't have time for things when you're not *making* time? If so, consider your priorities—maybe those things you're "too busy" for aren't at the top of your list and that's okay! You're doing a great job balancing things. Cut yourself some slack. You're juggling it all with grace.

REVERSED: You might be ignoring your priorities in favor of what might make others happy. Your imbalance is beginning to have a negative impact in your life. Time to make some changes and figure out what's most important to tend to. Reprioritize your happiness before others'.

Your collaborations—with friends, coworkers, lovers, etc.—are aligned in a truly divine way. There's something special going on in the connections you have, and it's supporting your holistic wellness. Perhaps the most beautiful thing is that each person or element at play brings their own unique qualities (and flaws!) to the table. When we're honest about what we have the capacity for and others do the same, we can be valuable to one another without abandoning ourselves.

REVERSED: Maximize your ability to create abundance by collaborating with your community. Nobody does it alone! When we can find common ground and honesty with those around us, we achieve a kind of alignment that infuses our collaborative work with magic.

FOUR OF PENTAGRES

The pursuit of stability and a quality life is a healthy one, but unfortunately it can distort into greed, selfishness, and a scarcity mindset. Your financial and physical goals are worthwhile, but be wary of spending too much time (or money) by yourself. You might feel alone in your endeavors—maybe you're the breadwinner of the family, or maybe you're a breaker of intergenerational trauma around finances—and you need to be surrounded by supportive, loving hands. How can you get more trustworthy, solid people on your team?

REVERSED: Check in on your current spending habits. Are you overspending? Feeling a bit greedy, perhaps? If it's not money you're indulging in, how else are you retreating, hiding, and hoarding your time, energy, and gifts? It's likely a response to trauma. Don't close off. Keep yourself open in spite of the trauma.

Times are tough. This card is known to pop up when we're empty, mourning, or fresh out of hope for a better future. Fives are often painful, but they're halfway through the cycle of ten. You're on your way out! For now, consider how you feel and let it wash over you like a tide. Allow it to come, allow it to pass.

REVERSED: You're on the mend after a period of financial struggle. Or you might be experiencing a spiritual low. Don't forget to tend to yourself as you recover from hard times. And don't lose who you are in the process of self-discovery, acquiring wealth, or changing lifestyles. You're expanding, not abandoning your inner self.

OUR WISHES FOR YOUR HERO'S JOURNEY . . .

We hope *Every Little Thing You Do Is Magic Tarot* inspires you to make space for your most expansive self. Consider this your permission to take the space you need and to take up space. And remember that the hero always returns to where it all began in the first place: the self.

We wish you the most thrilling, beautiful adventure, and a safe journey home.

With deep love and gratitude,

Callie Little *Moorea Seal*

CALLIE LITTLE AND MOOREA SEAL

SYMBOLOLOGY

Symbology is the visual language of the tarot. Symbolism can be found everywhere, from the animals that cross our paths to what we see in dreams and even in the logos on our clothing. In the everyday shuffle of life, we see most things as rather ordinary occurrences. But when we pay attention to what's happening around us—by examining our experiences and the personal connections we have to the world around us—these mundanities can all transform into something more magical.

When reading the tarot, regardless of the deck you use, you'll see many symbols. Some may be universal symbols that are easily identified with similar understanding across the board. Others are more niche, and some will be entirely personal. In one of Callie's favorite decks, for example, *The Lioness Oracle Tarot* by Alejandra Luisa León, roses, space, and big cats are persistent themes. Most people would probably agree that a lion has quite a different meaning when compared to a tabby kitten. If you're a historian, you might know that in the Victorian language of flowers, roses of different colors mean different things. You could also have a personal anecdote about an image and that would be equally important to your reading. If you see an owl on a card, for example, and it reminds you of a

favorite T-shirt from your childhood, use that insight. What might that symbol mean in your life? Perhaps the card is related to your past or an inner child. Maybe it's hinting at nostalgia, or something as simple as the clothing you're currently wearing.

In one of Moorea's favorite decks, *The Wild Unknown* by Kim Krans, black-and-white illustrations are contrasted by boldly saturated rainbows. These two spectrums of color tell a story all their own: The black-and-white might speak to the simplicity of certain life lessons and the technicolor scope of the human experience. A darkly lined card may allude to the heavy, impending nature of depression, while bright yellow rays may indicate a time of great warmth and, well, brightness.

Each deck has its own language and each will speak to you differently. When we're paying attention to and connecting with ourselves all the way from the top of our minds down into the depths of our intuition, working with your deck should feel like a conversation with a trusted friend. And, in our opinion, that relationship is kind of the most important part.

EVERY LITTLE THING YOU DO . . .

Within each of us is the hero and guide of our own magical journey. It shows up in mundane or quiet ways throughout our days—when our gut tells us to do something kind, when we make a right turn instead of a left, when we reflect on a hard decision made and say, *I am proud of my choices despite any hardship*. We truly believe that every little thing you do is magic.

Through the practice of tarot, all people, regardless of belief system or heritage, have access to their inner guide. Tarot begins, like we do, with a clear-eyed Fool ready to take on the world, caution be damned. It can be challenging, though, to take that first leap off the ledge and into the unknown, especially with something as old and mysterious as the tarot. We know the intimidation that may come with buying your first deck. We also know that it's easy to fall into a rut with any practice or ritual in one's life, to ignore the call to go inward. We offer tarot as a resource and support system for the exploration and validation of self—one that can be used throughout a lifetime.

Tarot challenges us to be more mindful about how we show up for ourselves, asking us to turn habits into

mindful rituals. Our habits rule our daily lives. They may unknowingly take over and consume our attention, pulling us away from our inner knowing—the true selves we most desire to be. We hope to provide you with a foundation upon which you grow new divinatory rituals, practice self-trust, and strengthen intuition. Tarot is a big, juicy tool kit to gain a deeper understanding of the self you've been longing for. May your inward journey be a lifelong joy.

... IS MAGIC.
