Introduction

Welcome to the magickal botanical world beyond the garden gates. This deck is a tool to help those wanting to create a magickal practice within a garden setting: you may have a lovely suburban garden, a country estate, an inner-city courtyard, a collection of houseplants or share a community garden. What matters is not the where but the divine act of gardening and that you do it yourself.

This is the difference between owning a garden and being a gardener: you can never be a green witch if your hand, heart and mind are not in each part of the creation of your magickal botanical oasis. Your study place is the garden and your teacher the trees, plants and flowers.

I've filled this deck with plant magick and guidance from my gardens, journals and experiences to enhance and inspire gardeners and garden dreamers alike. Explore the healing and supportive energies of fruits, vegetables, flowers and herbs in the cards and informative guidebook. Pick one card each day to bring balance to your life, and create inspirational oracle readings that will empower your outlook while you discover the secrets of the magickal botanical plant world that awaits beyond the garden gates.

Bunches of blessings,

Cheralyn Darcey

How to use the cards and guidebook

Green Witch Oracle contains a balanced selection of familiar plants that will lead you into deeper explorations in your own garden and your connections with the plant kingdom. I strongly suggest you record your discoveries in a gardening journal.

This deck can be used as a focal tool as you study plant magick, as a gardening companion or as a divination tool. Those working with complimentary therapies – especially essence creation – will find the cards and guidebook helpful tools in education, prescribing and mixture creation.

Along with the common name, botanical name and keyword, I've included with each guidebook entry oracle meanings to illuminate questions you have and as a guide to using the cards and the plants in your magickal work, cultivation notes, a list of handy magickal correspondences, an inspiring gardening quote and a spell that I've personally crafted just for your deck that uses the plant and its energies.

The images on the cards are from my personal gardening journals. I hope that the magick and wisdom of my garden comes forward to you from each card and helps you focus on the qualities and energies of each plant.

To use as an oracle, begin by selecting a card each day to help you explore the deck and plants within so you can form a strong magickal bond with the deck. This can be done at any time to reveal the influences present

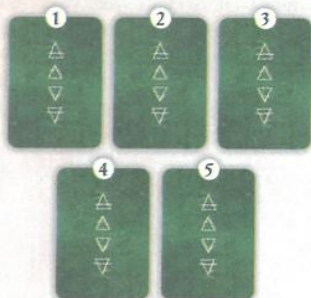

for the day. The keyword appears on each card, but you should look up the card in this guidebook to find the meaning that will support your day. Read through the other pieces of information present for your card to uncover helpful botanical information, and please explore outside of the deck as well.

When using as a divination tool, the deck can be used in card spreads alone or in combination with other oracle and tarot decks. On the following pages are three spreads I created especially for *Green Witch Oracle* to share with you.

EARTH Vegetables

1. Clarity

CARROT

(*Daucus carota* subsp.
sativus)

'When people will not weed
their own minds, they are
apt to be overrun by nettles.'

— HORACE WALPOLE

Oracle meanings

New ideas, breakthroughs and increases in finances and resources are all indicated, and you should trust your own judgement. There is a strong chance of triumph over a difficult challenge and the opportunity for sudden growth in what you are currently undertaking. Relationships will be focused on the physical, with lust, sex and passion high on the agenda. Be careful of overthinking, self-sabotage and roadblocks placed by others.

Cultivation

Preferably grow from seed in final position as transplanting seedlings is not recommended. Carrots like a cool environment but do not tolerate frost and will not grow well in tropical areas. Plant in late summer in cooler areas

and early summer in more temperate places. Ensure the soil is rich, friable, deep and free draining. Carrots may be harvested at any size you require. Many of the smaller and more rounded varieties can be grown in containers.

Magickal correspondences

Uses: fertility, passion, vision, independence, grounding

Deities: Vajra, Mercury

Celestial: Mars

Astrological sign: Virgo

Clarity spell

This oil will help clear your mind to get to the truth of matters. It will also open your vision during divination and dream work and when experiencing creative blocks.

Mix together equal amounts of carrot seed oil and full moon water. Place a dab on your third eye before meditating or working on an issue for which you are seeking deeper understanding.

2. Communication

PEA

(*Pisum sativum*)

'Gardening is about communication, relationships, routines and life enrichment. Gardens are places that connect us to the seasons and the life cycle.'

— COSTA GEORGIADIS

Oracle meanings

Peas tell us that now is the time to move ahead with projects, plans and ideas. There are new ways of thinking and approaching challenges and even life if you are willing to listen to what could be an alternate communication method with concepts you may have dismissed in the past. Sharing ideas, considering partnerships, gathering information and stepping up enthusiasm are all indicated. Be wary of haphazard actions and failing to follow through.

Cultivation

Ready to harvest between 12 to 16 weeks from sowing, peas prefer cooler growing conditions and are unsuitable for tropical environments. Plant in late winter in cold

zones to avoid frost damage to the flowers. In temperate areas they can be planted from early autumn through to late winter, and in the subtropics from early winter to spring. Peas require a sheltered position, growth support, free-draining soil and mulch to deter weeds. Smaller dwarf varieties can be grown in large pots.

Magickal correspondences

Uses: communication, openings, money, love, messages

Deities: Mercury, Venus, Aphrodite

Celestial: Venus

Astrological sign: Pisces

Communication spell

When experiencing communication blocks, try this simple spell to open channels.

Write the names of two people or areas of your life with which you have experienced a communication block on a piece of paper.

Place a fresh pea on either side of the page, and sew with blue thread through the peas and paper to attach the peas to the paper. Hang in a tree so the wind can open communication.

3. *Desire*

COS LETTUCE

(*Lactuca sativa*)

'Love is the flower of life, and blossoms unexpectedly and without law, and must be plucked where it is found, and enjoyed for the brief hour of its duration.'

— D.H. LAWRENCE

Oracle meanings

Fulfilment in many areas of your life can be found by working a little more on your current relationships. Overcoming challenges is indicated, and new material gain and recovery are also shown. Lettuce helps us get better physically and emotionally; it asks that you watch the way you are caring for yourself and to be careful about what it is you are focused on. Are your desires really serving your truth?

Cultivation

Lettuce is usually planted in spring or autumn in most areas or late winter through to mid-spring in cold zones. Before sowing, lay the seeds on wet paper towels and refrigerate for two days. Keep well watered once

sown or the seedlings are planted out. Lettuce grows best in full sun with an open soil that is rich and kept moist. Although all are annuals, many types are 'cut and come again' so can be harvested as they grow until the end of their season.

Magickal correspondences

Uses: lust, renewal, recovery, love, fertility

Deities: Venus, Min

Celestial: the moon

Astrological sign: Cancer

Desire spell

Renew your skin and boost your desirability while bringing what you desire closer.

Place together in a red bowl 2 tablespoons of finely shredded lettuce, 1 teaspoon of cornflour, 1 tablespoon of rolled oats, 1 tablespoon of dried milk, 1 tablespoon of fine powered clay and 1 drop of rose oil. Mix together while visualising what it is you desire. Pat onto a clean face, leave for 30 minutes then rinse off.

4. Emotion

CUCUMBER

(*Cucumis sativus*)

'A flower falls, even though we love it; and a weed grows, even though we do not love it.'

— DŌGEN

Oracle meanings

Any uncertainties that have been hanging around should begin to fall away soon. A commitment and even perhaps a major life decision will come up, and you are advised to take hold of your emotions before you determine the right path for you. Someone near you may express themselves in an unsettling way, so try and ride that wave gently until it passes. It could be time to take a new step forward.

Cultivation

Cucumbers grow better in tropical areas and can be planted from mid-winter right through to early autumn. Plant from spring to mid-summer in temperate zones, and from mid-spring to early summer in cold areas in a sunny spot with a mounded soil rich in organic matter.

They can also be trained to grow upon a support. Harvest when small for pickling or snacks, and ensure they don't get too large when using for salads.

Magickal correspondences

Uses: chastity, commitment, prosperity, improvement, expansion

Deities: Aphrodite, Venus, Hera, Uttu

Celestial: the moon, Venus

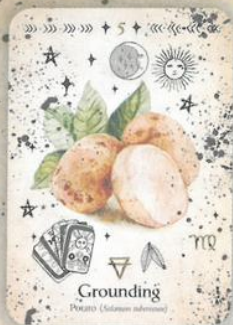

Astrological sign: Cancer

Emotion spell

To improve a situation and balance emotions, try this altar decoration.

Place a bowl of potable water on your altar and arrange items around it that indicate the issue you are focused on such as photos, personal items or notes. Slice a cucumber in circles, add to the water and sprinkle over edible flowers. Leave for at least one hour then decant into a water bottle. Have all (or as many as possible) of those involved in the situation drink the water.

5. Grounding POTATO

(*Solanum tuberosum*)

'When the world wearies
and society fails to satisfy,
there is always the garden.'

— MINNIE AUMONIER

Oracle meanings

Explore the deeper, innermost areas of yourself and situations, as potato indicates energies that are calling you to look again at what you may have once missed and will help to bring stability. If you are looking for an answer, try pulling back a little to let things settle on their own first. Challenges at the moment may include ignorance, self-centredness and forgetfulness, so make sure you are compassionate and focused.

Cultivation

In cool climates, plant potatoes from seed in spring after the last frost. In temperate areas you can plant in autumn and in tropical zones from summer through to winter. Grow in very sunny positions in deep, well-drained, rich soil and ensure that any potatoes that come to the

surface are covered with soil. Potatoes can be grown in large pots. Harvest new potatoes from three weeks after flowering and the rest 15 to 20 weeks from planting.

Magickal correspondences

Uses: image magick, healing, health protection, compassion, stability

Deities: St Patrick, Lugh, Taitiu

Celestial: the moon, the sun

Astrological sign: Virgo

Grounding spell

If you are feeling ungrounded this little dance ritual may help.

Place four potatoes on the ground (preferably outside) in a circle around you, with one at each compass point. Dance, skip or hop in any way you like around the potatoes while firmly planting your feet next to each potato.

Take the potatoes inside, cook according to your favourite recipe and then eat.

6. Leadership BROCCOLI

(*Brassica oleracea* var. *italica*)

'Plant your own garden
and decorate your
own soul, instead of
waiting for someone to
bring you flowers.'

— VERONICA A. SHOFFSTALL

Oracle meanings

It is time to take the initiative and step up, even if this means throwing your hat into many rings. Do not turn down opportunities that have even an inkling of promise as there is something circling at the moment that has a lot of potential. Good luck, growth, health improvements and physical gains are all on offer, as are moments of passion. Be careful to ensure you delegate as needed and that you speak up for yourself.

Cultivation

Broccoli is best grown in cold and temperate zones; sow in mid-summer through to late spring in these places. In warmer climates, sow from late summer to autumn. Broccoli will need to be planted in a different bed each year and requires a sunny spot with a well-drained soil,

which will benefit from a nitrogen fertiliser. Harvest before the head begins to loosen and the first flowers appear.

Magickal correspondences

Uses: profit, strength, finances, good luck, protection

Deities: Zeus, Jupiter

Celestial: Jupiter, the moon

Astrological signs: Libra, Gemini

Leadership spell

Unlock opportunities to take the lead
and increase luck with a candle spell.

Push a tiny key into the top of a thick
candle as you tell the candle what you desire.

Set the candle upon a safe base and light.

Sprinkle with chopped broccoli. Leave to
burn completely down and then bury the
remains under the largest tree you can find.

7. *Passion* BEETROOT

(*Beta vulgaris*)

'An addiction to gardening is not bad when you consider all the other choices in life.'

— CORA LEE BELL

Oracle meanings

Look at the core of what usually motivates you for direction and a lifting of any negative energies, because a focus on self-love and developing a better understanding is needed. Beetroot supports your heart chakra and will show you that new projects, personal goals and emotional healing are all in positive light with a chance of success. Challenges include family disagreements and getting stuck on the superficial.

Cultivation

Beetroot seeds need to be soaked for half a day before planting. They can be sown all year in tropical areas, from winter through to autumn in temperate zones and from mid-spring to mid-summer in colder areas. This plant requires a very friable soil that is fertile and a

sunny position. Leaves can be harvested lightly and baby beets from 10 weeks. Pull up every second beet at this time to allow room for the rest of the crop to mature to full size in a few more weeks.

Magickal correspondences

Uses: love, blood magick, passion, beauty, joy

Deities: Aphrodite, Venus

Celestial: Saturn, Venus

Astrological sign: Sagittarius

Passion spell

Boost passion in a relationship or rekindle motivation for a project in beet ink.

On a piece of paper, write your name and that of your lover or project using the dried twig of a red-flowering plant dipped in $\frac{1}{4}$ cup of beetroot juice. Wrap the twig in the paper and throw it in a fire, saying: 'Alive with the fire, the passion within us grows higher.'

8. Productivity

KENT PUMPKIN

(*Cucurbita moschata*)

'The watering of a garden
requires as much judgment
as the seasoning of a soup.'

— HELENA ELY

Oracle meanings

Your hard work, planning and experience should be paying off now and there is reason to keep going with what you are currently working on. Additional resources can be safely used and there is indication of a promotion, windfall or increase of some sort. There are good energies surrounding health and also fitness levels, although challenges will include failure to keep these at their optimum through neglect.

Cultivation

Sow Kent pumpkin from mid-spring through to late summer in most areas well after the last frost. They can be started in greenhouses or indoors in pots and then planted out. Pumpkins will need a warm, full sun position with a rich soil that holds water well. To ensure

larger pumpkins, remove all but a few from each plant. Harvest before the frosts return, from late summer through to mid-autumn.

Magickal correspondences

Uses: risk, healing, abundance, guidance, fertility, love

Deity: Chicomecóatl

Celestial: the moon

Astrological sign: Cancer

Productivity spell

This is a messy smash-fest to rid yourself of things holding you back.

Write down all the things you think are holding you back on separate pieces of paper. Make slits in a pumpkin and poke the notes into the slits. Take the pumpkin outside and write in black marker on it: 'With this pumpkin, release and go.' Smash the pumpkin with a mallet.

9. Protection ONION

(*Allium cepa*)

'But always, to her, red
and green cabbages were
to be jade and burgundy,
chrysoprase and porphyry.
Life has no weapons against
a woman like that.'

— EDNA FERBER

Oracle meanings

Onions share ways to take responsibility and empower your own life. They indicate that you are on the right path, that you are protected and that you have to keep going and not give up. Believe in yourself and listen to that inner voice; your truth is the most important element right now. Take care that you do not take on things you really do not understand or that are not part of your personal journey.

Cultivation

Onions do well if planted after a leafy green crop in a well-drained, potassium-rich soil that is free draining. Full sun is also required, and they can be successfully grown in larger pots. Plant from summer to spring in

cold climates, mid-summer through to mid-autumn in temperate areas and from autumn to winter in tropical places. Harvest once the foliage begins to die, which will be around five to six months after planting.

Magickal correspondences

Uses: endurance, lust, spiritual health, banishes negativity, healing

Deities: Áine, Osiris

Celestial: Mars

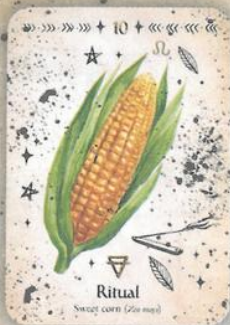

Astrological sign: Aries

Protection spell

Here is a quick and easy emergency protection spell you can do anywhere.

Take a bowl of any edible food with onion in it and hold it above your head with your eyes closed. Visualise a bolt of red powerful energy, followed by a white wave of light, empowering and then cleansing your food. Eat the food, and with each swallow feel the protection of the onion filling you.

Cultivation

Sweet corn can be planted in tropical and temperate climates at any frost-free time and in colder zones from autumn through to early summer. botrytis)

'When the flower blooms,
the bees come uninvited.'

— RAMAKRISHNA

Oracle meanings

Cauliflower heralds a change. This might have happened recently, be happening soon or the energy around a change is unsettled. A rebirth can now take place, and if you're holding on to what has gone before it is time to let go for good. A reactivation can take place in any area of your life if there has been a lull or setback. Be wary of deceit and corruption.

Cultivation

Plant cauliflower in early to mid-autumn in most areas and in colder climates from late summer through to autumn. Ensure you plant the seeds in full sun in a bed that has not had brassica crops for at least two previous seasons. The soil needs to be rich and water retentive. Marjoram indicates celebrations, excitement, holidays, good news and physical radiance. Freedom that was once out of reach might now be obtainable. Be careful of over-indulgence and over-spending and being too free with information that may be better kept quiet for now.

Cultivation

Marjoram grows well either as an annual or perennial in rockeries, garden beds and containers. Sow after the danger of the last frost has passed from mid-spring through to early autumn. Marjoram needs to be well watered as it has shallow roots but not overly as it easily

rots, so it does well in a soil that is enriched and well drained. Harvest the leaves as required by snipping off the stems with scissors.

Gather a bunch of rosemary and natural string or yarn. Trim to an even length as many sprigs as you feel will create a smudge stick of the size and appearance you want.

Wrap the cut end of the stems a few times with the string and tie to secure, then tightly in a crisscross fashion to the end and tie off. Hang in a cool, moisture-free place until dry.

17. *Regeneration* TARRAGON

(*Artemisia dracunculus*)

'Gardening adds years
to your life and life
to your years.'

— ANONYMOUS

Oracle meanings

What to do next is something that needs focus under the influence of tarragon; it will often indicate what work needs to be done to align the physical with the spiritual. A gift could be coming your way soon and a relationship will step up a level. Look at what can be redone if given extra care to grow again or if bringing it back into your life will serve you in a positive way. Tarragon also highlights plagiarism or taking inspiration without credit.

Cultivation

Tarragon is a perennial herb that can be sown in most climates in the spring, after the danger of the last frost has passed, up until early summer. It must be positioned in full sunlight and will do well either in garden beds

or deep containers with a richly fertile soil. Due to its extensive root system, this plant requires infrequent watering once established if mulched well. Harvest leaves as required.

19. Strength FENNEL

(*Foeniculum vulgare*)

'I have never had so many good ideas day after day as when I worked in the garden.'

— JOHN ERSKINE

Oracle meanings

You will find a greater strength and positive grounding energy coming forth and even an invitation to undertake a new life path. Friendships are highlighted by fennel, and you may find you are spending additional time with those you align closely with. Situations in which sharing is high on the agenda will occur, and you are being prompted to share or teach what you know. Be careful not to work too hard or to become unnecessarily reclusive.

Cultivation

Although a perennial herb, in most places fennel is usually grown as an annual. Plant from early autumn through to late winter in tropical areas, from early autumn to late spring in temperate zones and in colder environments from early autumn until early summer.

Fennel needs an open, friable, rich soil and, although it grows best in full sun, it will still do well in semi-shade. When fennel is about fist sized it is ready to harvest.

20. Success PEPPERMINT

(*Mentha x piperita*)

'One of the most delightful things about a garden is the anticipation it provides.'

— W.E. JOHNS

Oracle meanings

Peppermint indicates rapid progress, a quick return or increase of positive energies, and if you are seeking an answer it is a loud and firm yes! Make sure you are directing all your energy and attention to the task at hand, and if you are in a relationship try to do more activities with that person that pleases them. There is a need to listen to others and consider other arguments at the moment, but do not let others completely make decisions for you.

Cultivation

Mint is a perennial herb that grows well from cuttings and can be planted at any time of the year in most climates. It prefers shade and a moist, water-retentive soil. Mint can become invasive very easily, so it is usually

better grown in containers. Harvest at any time by plucking leaves as required.

21. Trust

BASIL

(*Ocimum basilicum*)

'The garden suggests there might be a place where we can meet nature halfway.'

— MICHAEL POLLAN

Oracle meanings

Basil will indicate energies surrounding trust and the workings of relationships. Consideration and putting more into gaining harmonious ground are required and, although this does include romance, basil is referencing any relationship or connection. Education and travel are all areas that are shining with positive vibes at the moment, but be wary of being in situations or relationships that you know are not good for you.

Cultivation

Common basil is an annual but there are perennial varieties available. Plant annual basil from spring to early summer in tropical zones, spring to the end of summer in temperate places and autumn to mid-summer in colder climates. Although it prefers full sun, basil will

grow in semi-shade and requires a fertile, free-draining soil in either a garden bed or pot. Harvest leaves as required and remove flowers as spent to extend seasons:

22. Wisdom BAY

(*Laurus nobilis*)

'I love being asked to identify plants, and I don't know which gives me more pleasure: to know what they are or not to know what they are.'

— ELIZABETH LAWRENCE

Oracle meanings

External assistance should be sought, which can take the form of personal consultancy or research. You do not have all the facts or the facilities just yet but are still in a good position. Bay indicates success through diligent application and also heralds new romantic relationships. Be wary of speaking your mind without care of others around you as you are not going to be the most knowledgeable or experienced.

Cultivation

Bay is a large tree that is propagated via seeds or cuttings and will grow best in a temperate/Mediterranean climate. They will grow in most free-draining soils and require full sun or semi-shade. Although slow growing,

bay trees will reach over 10 metres in height eventually so space needs to be taken into consideration. Harvest any time by simply picking the leaves.

23. Abundance GRAPE

(*Vitis vinifera*)

'More grows in the garden
than the gardener sows.'

— SPANISH PROVERB

Oracle meanings

Stay where you are and grow what you need there, as this is a fertile time and place. Grapes will indicate that magick is about, especially from the garden, so get out there as you will find opportunity and inspiration. Family stability, happiness and tradition and the way they can support you are all things that should be remembered and implemented. Don't be disingenuous, and be very careful not to cancel appointments.

Cultivation

This vine grows best in areas that experience a dry summer and wet, cold winter and is planted in winter. Grapes can be grown upon structures such as pergolas, trellises and screening as long as they are very strong. Most soils will support grapes, but you will be rewarded with better crops

in improved earth. Position in a sunny area, and research pruning requirements and harvest as suggested for your variety.

24. Agreement

STRAWBERRY

(*Fragaria* × *ananassa*)

'There can be no other occupation like gardening in which, if you were to creep up behind someone at their work, you would find them smiling.'

— MIRABEL OSLER

Oracle meanings

Working with others will bring a huge boost for you at the moment, and if you are thinking of making an offer in business or even a romantic proposal it should be met with a favourable response. Group work, connection with others and partnering with like-minded individuals and entities are all areas that strawberry works with. Inability to share or wanting to win at all costs will be highly detrimental to you.

Cultivation

This berry can be successfully grown in most areas, with the best results coming from planting that occurs between mid-autumn through to late winter. Strawberries can be grown in garden beds but also do

very well in large containers. The soil needs to be rich and well drained and covered with a good mulch to discourage weeds and to keep the soil warm. Runners that come forth can be used as cuttings to create new plants. Harvest when the berries are a rich red in colour.

25. *Cleansing* LEMON

(*Citrus x limon*)

'You can bury a lot of troubles digging in the dirt.'

— ANONYMOUS

Oracle meanings

The end of one phase and the beginning of another is indicated and bought forward by lemons. A change of environment or situation and in your way of thinking is needed and will help you proceed. Old habits need to die; now is a great time to do it and have it done for good.

Cultivation

Lemon trees can be grown in most areas, but you will need to ensure the warmest spot possible in cold climates. Plant lemon trees in tropical climates between mid-spring and early summer, and in temperate and cold areas from early through to late spring. The soil will

need to be very free draining and the tree positioned in full sun. Remove the flowers in the first two seasons to encourage strong tree growth. Harvest as the lemons become yellow and firm.

26. Continuance

APPLE

(*Malus domestica*)

another in its place.'

— CARL LINNAEUS

Cultivation

Plant apple trees from early winter to mid-spring in tropical zones and from late autumn through to late spring in all other areas. Grow in a sheltered, full sun position with a free-draining and fertile soil. Ensure that

the young tree is very well watered in the first few weeks. Apples benefit from the application of a nitrogen-based fertiliser each year before fruiting. Harvest apples when they smell and taste ripe.

27. Duality

BANANA

(*Musa acuminata*)

'Gardening is civil and social, but it wants the vigor and freedom of the forest and the outlaw.'

— HENRY DAVID THOREAU

Oracle meanings

It is time to look at the shadow and the light in conjunction with each other; each is as strong as the other and both have positive qualities and learning points for you. The answer to any question is 'Maybe', and perhaps moving away a little will allow a better view as bananas ask that you stand back and look at the horizon. Do not give in to any situation that doesn't align with you at present.

Cultivation

Considered to be a perennial herb as they don't form a woody stem as a tree does, bananas are grown from suckers taken from other banana plants. Plant these at any time in tropical, subtropical and temperate areas that do not drop below 15°C. They need a very fertile, well-

drained though moist soil and a position that enjoys full sun but is sheltered from winds. Harvest entire bunches of bananas around a month after individual fingers cease growing and are well rounded.

28. *Energy* ORANGE

(*Citrus x sinensis*)

'A garden requires patient labor and attention. Plants do not grow merely to satisfy ambitions or to fulfill good intentions. They thrive because someone expended effort on them.'

— LIBERTY HYDE BAILEY

Oranges indicate that anything is possible, although you need to get that willpower working hard. There will be challenges but you can overcome them, and someone around you may need extra support at this time. Be wary of apathy, of losing interest too soon before giving something a chance, and of negativity.

Cultivation

Plant oranges in tropical zones from spring to summer and in cold or temperate areas from early spring to

late autumn. Orange trees need a free-draining, rich soil in a full sun position that is sheltered from winds and frost. Remove any flowers that develop for the first two seasons to ensure strong tree growth. Harvest when the fruit begins to fall from the tree and is sweet and juicy.

The wisdom of nature is at the forefront, and answers, discoveries and inspiration will be found there for you. Plan well, stick with things and look after those around you. Challenges may be a failure to connect with others and inauthenticity.

Cultivation

Watermelon seeds require a warm soil of at least 21°C to germinate and usually do not do well in colder climates. Plant from mid-spring to mid-summer in temperate areas and from early spring through to mid-summer in tropical places. The soil needs to be rich and the position should be full sun with plenty of space.

30. Love

TOMATO

(*Solanum lycopersicum*)

'The lesson I have thoroughly learnt, and wish to pass on to others, is to know the enduring happiness that the love of a garden gives.'

— GERTRUDE JEKYLL

Oracle meanings

Although sometimes considered a vegetable due to its culinary use, tomatoes are actually a fruit and have strong energetic properties. Tomatoes will inspire and invite love into your life of all types and on all levels. Alignment is signified, as are chances for an increase in assets. Plans are liable to change, and you should be ready for adaptation in this and other areas. Be careful to communicate effectively with your partner and close friends.

Cultivation

Plant tomatoes from mid-autumn to mid-winter in tropical zones, late winter to early summer in temperate areas and in colder climates from mid-spring to early

summer. They will need a full sun position with free-draining soil, and ensure you rotate tomato crops every year so you are not growing them in the same bed two seasons in a row. Tomatoes are best left on the vine to fully ripen before harvest to ensure full flavour.

31. *Luck*

LIME

(*Citrus x aurantiifolia*)

'Many things grow in the garden that were never sown there.'

— THOMAS FULLER

Oracle meanings

You may find you are right in the middle of a situation at present or that something is stuck in circles, and this could be caused by overreactions or too much interference. It's time to let things progress at their own pace. Limes bring luck with them, so take a chance and be ready for the ups and downs this energy brings but know that time is on your side. Don't over-plan, and be open to letting complexities unravel on their own.

Cultivation

Lime trees need heat, humidity and sun so do not do well in cool to cold climates. Plant from mid-spring to early summer in tropical zones, early spring to early summer in temperate areas and, if you are up for the challenge, the same in cooler environments. Ensure they

are planted in a nitrogen-rich soil that is prepared with well-rotted manure and compost. Harvest when the fruit begins falling from the tree.

32. Vitality

FIG

(*Ficus carica*)

'Plants give us oxygen for the lungs and for the soul.'

— LINDA SOLEGATO

Oracle meanings

Figs will show that you can and should look at what you have and what is going on with new eyes. Someone may be about to bring trouble to your sphere, so make sure you protect yourself.

Cultivation

Although fig trees do best in warm, dry to even humid environments, they are rather adaptable to many other climates and can be planted in sheltered though sunny spots throughout the year. They are easy-care, deciduous fruit trees that rarely require pruning, are self-fertile and,

once established, are frost tolerant. You will need a soil that is rich but still very well draining. Harvest when the fruit is soft as it will not ripen once picked.

STOCK

(*Matthiola incana*)

'I like gardening. It's a place where I find myself when I need to lose myself.'

— ALICE SEBOLD

Oracle meanings

Stocks offer confidence, calmness and a centred place to rest amid turmoil and change. It is time to focus, to think more deeply and slow down. Your personal truth needs some attention, so don't let it get lost in your present dealings. Stocks also indicate and lead you to a balanced place in emotional swings. Be careful of losing yourself amid the behaviours of others.

Cultivation

Plant in tropical places from mid-summer to the end of autumn, in temperate areas from mid-summer until early winter and in colder climates plant stock from mid-summer until mid-autumn. 'I've always felt that having a garden is like having a good and loyal friend.'

— C.Z. GUEST

Oracle meanings

There is reason to be thankful and help is on its way to balance energies. Pink roses will show you that ways to happiness are opening for you and there will be a reason to be joyful. Something of value is in focus at present; this could be an exchange of a gift, a windfall or the sale of a large item or simply discussion around it. Be careful that you do not interfere where you are not welcome and be wary of legal deception.

Cultivation

Roses are best planted while bare rooted during their dormant stage between late autumn and late winter. They need a full sun position, prefer a loamy soil with a clay substructure, and will grow in sandy soil if it is improved with plenty of organic matter. Water heavily

This is also a period of personal growth and spiritual awakenings, and answers can be found within aspects of these. Listen to your inner voice but do not become overwhelmed with negative self-talk.

Cultivation

Although they don't do well in the tropics or very hot places, in other zones daffodil bulbs can be planted in autumn and flowers can be expected to appear in spring. Ensure regular liquid feeding, a rich, friable soil and full sun although they will tolerate semi-shade, especially in

CHRYSANTHEMUM

(*Chrysanthemum morifolium*)

'My green thumb came only as a result of the mistakes I made while learning to see things from the plant's point of view.'

— H. FRED ALE

Oracle meanings

A phase in which trust, completion, a sense of belonging and peace has been reached is signified by the appearance of chrysanthemums. Deeper intimacy in relationships is highlighted, and you may want to explore this area of your life as a long-term commitment needs attention. A cycle of learning is coming to an end or you now have all the facts you require. Creative blocks, melancholy and weak boundaries are challenges.

Cultivation

Plant from late autumn until late spring in tropical zones, all through spring in cold areas and in temperate environments you can plant from late spring through to early summer. This flower must have very well-drained

soil that is friable and well fertilised. Good air flow and a sunny, warm, sheltered spot are also important. Flowering will occur in about 18 weeks and vase life is 10 to 20 days.

— LUTHER BURBANK

Oracle meanings

A better understanding is indicated and a reason to be more optimistic about outcomes and the roads to get there. There are opportunities for nurturing encounters and a general aura of happiness pervades. Marigolds help us focus on the positive aspects of even the most difficult events. Your inner child may need to come out for a play, and be sure to take creative invitations. Be wary of not having all the facts and of emotional blockages.

Cultivation

Marigolds can be planted right throughout the year in most tropical and subtropical zones, in spring in cold environments and in summer in temperate areas. They are an annual that must grow in a sheltered spot and

prefer a warm, full sun position. Marigolds work well in pots and baskets as well as garden beds and need a friable soil that is improved with organic matter. They will flower in about 12 weeks and vase life is six to seven days.

41. *Purification* SNAPDRAGON

(*Antirrhinum majus*)

'Let us give nature a chance;

better than we do.'

— MICHEL EYQUEM DE MONTAIGNE

Accurate and unbiased observation is called for, so don't hesitate to ask for a little more time. A reversal of roles, fortune and even outcomes could be coming. Don't become too ruthless or scatter yourself too far. A project that is close to you is in danger of failing.

Cultivation

Plant from early autumn to mid-spring in tropical areas, any time but autumn in temperate zones to ensure spring flowers and autumn and also early spring in cold environments. Snapdragons prefer full sun and friable, well-drained soil. They will flower in about 16

(*Dahlia pinnata*)

'I cultivate my garden, and
my garden cultivates me.'

— ROBERT BREAUULT

Oracle meanings

Be receptive to communications and messages that are incoming at present as there is much to benefit your current situation. Dahlias inspire and ask you to improve yourself and current situations. You may find keys and deeper meanings to mysteries that have evaded you for some time or be given offers that seem unusual. It can be very easy to fall for deceptive flattery and to have unrealistic expectations at the moment.

Cultivation

Plant from early summer to early spring in tropical areas, all through spring in temperate zones and in colder places in autumn. Dahlias can be grown from tubers or seed and do best in a sheltered, full sun position with a well-drained, friable soil. Taller varieties may require

staking and plants should be deadheaded regularly to encourage repeat flowering. They will flower in about 16 weeks and vase life is five days.

43. Tranquillity VIOLET

(*Viola odorata*)

'Everything that slows us down and forces patience, everything that sets us back into the slow circles of nature, is a help. Gardening is an instrument of grace.'

— MAY SARTON

Oracle meanings

Although you may have felt tested recently, a period of advancement and breaking free is now open. Adaptation may be necessary; however, a greater depth of meaning, loyalty and truth is inspired by the appearance of violets. Secrets are safe, and those you hold closest are also afforded this protection. The truth will prevail and that which is no longer wanted will be weakened. Be wary of intolerance, insensitivity to the feelings of others and blind faith.

Cultivation

In hot climates plant violets in autumn, cold areas in autumn and early spring and in temperate environments from mid-summer until mid-autumn. Violets prefer

semi-shade and some sun through the day in cooler places, a well-draining though moist and rich soil and they do make a good indoor plant. They will flower in about 16 weeks and vase life is around seven to eight days.

Magickal correspondences

Uses: purification, happiness, truth, death, advancement

Deities: Io, Zeus, Priapus, Attis, Aphrodite, Venus

Celestial: Venus

44. Victory

NASTURTIIUM

(*Tropaeolum majus*)

'A garden is always a series of losses set against a few triumphs, like life itself.'

— MAY SARTON

Oracle meanings

Nasturtiums indicate a firm message of triumph and success over challenges as well as support being found. They inject the energies of strength and vigour into all they come in contact with and illuminate ways to find resolution and gain self-confidence and self-reliance. Advancement is possible now, so get moving. Do not become obsessed with a need to impress others or lose your belief in your own unique abilities.

Cultivation

In cold climates plant in spring, in the tropics from early autumn to mid-summer and in temperate areas from late spring to early summer. Though they prefer a sunny spot with fertile and dry soil, nasturtiums will grow in most conditions. Over-use of fertiliser or compost can

cause over-production of leaves and less flowers. They will flower in about 10 weeks and vase life is seven to nine days.

Acknowledgements

I have to thank my garden: you are the constant in my life, the one that knows me best, challenges me, comforts and surprises me, and without you, wherever you rise, I am not me. Thanks for keeping me on my toes, happy, healthy and maybe a little wiser for your lessons.

This oracle is dedicated with much gratitude to my father. As those close to me know he is my stepfather, but he chose to be my dad and for that I was blessed with a wonderful childhood full of his crazy (but workable) off-the-grid inventions and his love of tradition and magick.

Thank you again, as always, to the dedicated and delightful team at Rockpool Publishing, who work right there alongside me while I plant the seeds and grow the bountiful plant titles that I am blessed to share so widely.
